- 1. The sum of binary numbers 11111 and 00001 is given by:
 - 1) 100100 2) 100000 3) 100001 4) 100010

Ans: 2

2. A train travels from Chennai to Madurai at a constant speed 60 kmph and return a constant speed of 30 kmph. The average speed of the train is:

1) 40 kmph2) 45kmph3) cannot be determined4)Data insufficient

Ans: a (Note: Avg. speed = $\frac{2xy}{x+y} = \frac{2x60x30}{60+30} = 40$)

3. A bus starts from rest with a constant acceleration of 10 m/sec². At the same time car travelling with a constant velocity of 60 m/sec overtakes the bus. At what distance will the bus overtake the car?

2) 720 m

- 1) 360 m
- 3) 1.4 km

4) Bus will never overtake the car

Ans:4 (Time taken by car to meet the bus: v.t = 1/2a.t

 $60xt = \frac{1}{2} x10xt^2 \rightarrow 12$ sec.

Once the car overtaken the bus, the distance travelled by the car in unit time is greater than the distance travelled by the bus and hence bus will never overtake the car.

- 3.1. Two trains *A* and *B* are running on parallel tracks in the same direction at the same speed of 80kmph. After time 't' the train *A* retards to half its speed and train *B* acceleration to double the Speed. The relative speed between the trains *A* and *B* after time 't' kmph is:
 - 1) 80 kmph

2) 160kmph

3) 120 kmph

4) Cannot be determined because initial distance between the two trains is not given

Ans: 3

Explanation

After time, t, Speed of train B is (80+80) kmph = 160 kmph and Speed of train A is 40 kmph

 \therefore Relative speed between them = 160 - 40 = 120 kmph

4. The average marks obtained by a student in 6 subjects is 88. On subsequent verification it was found that the marks obtained by him in a subject was wrongly copied as 86 instead of 68. The correct average of the marks obtained by him is-

Explanation $h = \frac{e\sqrt{3}}{2}$ $A = \frac{b^2}{\sqrt{3}} = \frac{(12\sqrt{5})^2}{\sqrt{3}} = 144\sqrt{3}$ 11. The minimum value of $2\sin^2\theta + 3\cos^2\theta$ is 1. 1 2. 3 3.2 4.4 Ans. 1 Explanation $2\sin^2\theta + 3\cos^2\theta = 2 \times (\sin^2\theta + \cos^2\theta) + \cos^2\theta = 2 + \cos^2\theta$ $(\sin^2\theta + 3\cos^2\theta = 2 \times (\sin^2\theta + \cos^2\theta) + \cos^2\theta = 2 + \cos^2\theta$ $(\sin^2\theta + \cos^2\theta = 1 \text{ for all values of } 0)$ Minimum value pertains if $0 = 180^\circ$ $= 2 \cdot 1 = 1$ (for $\cos 180 = -1$) 12. If number of vertices, edges and faces of a rectangular parallelepiped are denoted by v, e and f respectively, the value of $(v - e^+ + f)$ is 1. 4 2.2 3.1 4.0 Ans. 2 Explanation The rectangular parallelepiped has 8 vertices (v), 12 edges (e), and 6 faces(f). Hence, $V - E + F = 8 \cdot 12 + 6 = 2$. (This is Euler's formula for a polyhedron) Euler formula for a polyhedron Euler formula for a polyhedron Euler formula for a tetrahedron: it relates, the number of faces, vertices, and edges of any polyhedron. It is written $F + V = E + 2$, where F is the number of faces, V the number of vertices, and E the number of edges. A cube, for example, has 6 faces, 8 vertices, and 12 edges and satisfies this formula. 13. 5 persons will live in a tent. If each person requires 16m ² floor area and 100m ³ space for air then the height of the cone of smallest size to accommodate these persons would be? 1. 18.75 m 2. 16m 3. 10.25 m 4. 20 m Ans. 1								
h = $\frac{12}{\sqrt{3}}$ A = $\frac{h^3}{\sqrt{3}} = \frac{(12\sqrt{3})^2}{\sqrt{3}} = 144\sqrt{3}$ 11. The minimum value of $2\sin^2\theta + 3\cos^2\theta$ is 1. 1 2. 3 3.2 4. 4 Ans. 1 Explanation $2\sin^2\theta + 3\cos^2\theta = 2 \times (\sin^2\theta + \cos^2\theta) + \cos^2\theta = 2 + \cos^2\theta$ $(\sin^2\theta + \cos^2\theta = 1 \text{ for all values of } \theta)$ Minimum value pertains if $\theta = 180^\circ$ $= 2 - 1 = 1$ (for $\cos 180 = -1$) 12. If number of vertices, edges and faces of a rectangular parallelepiped are denoted by v, e and f respectively, the value of $(v - e + f)$ is 1. 4 2. 2 3. 1 4. 0 Ans. 2 Explanation The rectangular parallelepiped has 8 vertices (v), 12 edges (e), and 6 faces(f). Hence, $V - E + F = 8 - 12 + 6 = 2$. (This is Euler's formula for a polyhedron) Box: Euler formula for a polyhedron Euler formula for a tertahedron: it relates, the number of faces, vertices, and edges of any polyhedron.  13. 5 persons will live in a tent. If each person requires 16m² floor area and 100m³ space for air then the height of the cone of smallest size to accommodate these persons would be? 1. 18.75 m 2. 16m 3. 10.25 m 4. 20 m 			1	. <u>.</u>	• • • •	2 0	1 400	3
For air then the height of the cone of smallest size to accommodate these persons would be?1. 18.75 m2. 16m3. 10.25 m4. 20 mAns. 1	13.	5 persons will	live in a tent. If	each person	n requires 16m	- floor are	a and 100n	n [°] space
would be? 1. 18.75 m 2. 16m 3. 10.25 m 4. 20 m Ans. 1	ア	tor air then the	e height of the	cone of sr	nallest size to	accommo	date these	persons
1. 18.75 m 2. 16m 3. 10.25 m 4. 20 m Ans. 1		would be?			0 40 0-		4.00	
Ans. 1		1. 18.75 m	2. 16m		3. 10.25 m		4. 20 m	

The required floor area/person = 16 sq. m For 5 persons, floor area required = 80 sq. m For 5 persons, space required inside the tent = $100x5 = 500m^3$ Let the radius of tent be r meter and height be h m. Base area = $\pi \times r^2 = 80 \rightarrow r = \sqrt{25.4545} = 5.045$ m The volume of air required = 5×100 m³ $1/3 \times \pi \times r^2 \times h = 500 \rightarrow h = 18.75$ m.

14. The difference between successive discounts of 40% followed by 30% and 45% followed by 20% on the marked price of an article is Rs. 12. The marked price of the article is:

1. Rs. 4002. Rs. 2003. Rs. 8004.Rs. 600Ans. 4**Explanation**Suppose, the marked price of the article= Rs. x;The price after 40% and 30% successive discounts = $x \times 0.60 \times 0.70 = 0.42x$;The price after 45% and 20% successive discounts = $x \times 0.55 \times 0.80 = 0.44x$;Given: $0.44x - 0.42x = 0.02x = 12 \rightarrow x = Rs. 600$.

.15. The area of the triangle formed by the graphs of the equation x=0, 2x + 3y=6 and x + 3y=6

y = 3 is: 1. 1 sq. unit 2.1.5 sq. unit 3. 1 sq. unit 4. 4.5 sq. unit

Explanation

Y - axis

2(0,3)

٠

(0,2) B

-x

Ans. 2

The sum is represented in the following figure:

The sum is to find the area of triangle ABC.

The area of triangle $=\frac{1}{2} \times \text{base} \times \text{height}$ Area of triangle ABC = Area of triangle OAC - Area of triangle OAB $=\frac{1}{2} \times 3 \times (3-2) = 1.5$

16. Among the following equations,

eramó x + 2y + 9 = 0;5x - 4 = 0;2y - 13 = 0;2x - 3y = 0, the equation of the straight line not passing through origin is-4. 2y - 13 = 01. 2x - 3y = 02. 5x - 4 = 03. x + 2y + 9 = 0Ans.(3)**Explanation** Examine the given options: x + 2y + 9 = 0; (this line will intersect both the axes) 5x - 4 = 0; (This line will be parallel to Y-axis), i.e., $x = \frac{4}{5}$, a constant 2y - 13 = 0; (This line will be parallel to X-axis) $y = \frac{13}{2}$, a constant 2x - 3y = 0; (This line will pass through the origin) $\frac{x}{y} = \frac{3}{2} \rightarrow y = \frac{2}{3}x$ (y = mx form) The HCF of $x^8 - 1$ and $x^4 + 2x^3 - 2x - 1$ is: 17. 3. $x^2 - 1$ 1. $x^2 + 1$ 2. x + 1 4. x − 1 Ans. 3 **Explanation** $x^2 - 1 = (x + 1)(x - 1) \rightarrow x = -1, 1;$ Both the values of x will satisfy the other equation; $x^{8} - 1 = (x^{4} + 1) (x^{4} - 1) = (x^{4} + 1) (x^{2} + 1) (x^{2} - 1) = (x^{4} + 1) (x^{2} + 1) (x + 1) (x - 1)$ $x^4 + 2x^3 - 2x - 1 = (x^4 - 1) + 2x^3 - 2x$ $= (x^{2} - 1)(x^{2} + 1) + 2x(x^{2} - 1)$ $=(x^{2} - 1)(x^{2} + 1 + 2x)$ $= (x + 1)(x - 1) (x + 1)^{2}$ \therefore H.C.F = (x + 1) (x - 1) = (x² - 1)

Hence, $(x^2 - 1)$ will be the appropriate answer.

	18	The least number which when divided by 6, 9, 12, 15, 18 leaves the same remainder 2					
		in each case is:				5	
		1. 178	2.182	3. 176	4. 180	\mathcal{S}	
		Ans. 2			\sim		
		Explanation					
		The LCM of these n	numbers = LCM (6,	9, 12, 15, 18) = 180;	(0)		
		Hence, the appropri	iate answer = $180 +$	2 = 182;	001		
		The number is 1	82 which when is di	vided by 6,9,12,15 and	18 leaves remainder as		
	2 in ea	ach case.			10		
					.0)		
	19.	A certain sum will	amount to Rs. 12,1	00 in 2 years at 10% p	er annum of compound		
		interest, interest bei	ng compounded ann	nually. The sum is-			
		1. Rs. 12000	2. Rs. 6000	3. Rs. 8000	4.Rs. 10000		
		Ans. 4		<u><u> </u></u>			
		Explanation		<u> </u>			
		For CI case: $A = P($	$(1 + R/100)^{n}$;)`			
		12100 = P(1 + 0.1)	$P^2 = P \times 1.1 \times 1.1 \rightarrow I$	P = Rs. 10000.			
	21.	A's 2 days work is	equal to B's 3 day	s work. If A can comp	lete the work in 8 days		
		then to complete th	e work B will take:				
		1. 14 days	2 . 15 days	3. 16 days	4.12 days		
		Ans. 4.					
		Explanation					
		Same work is comp	oleted by A in 2 days	s and B in 3 days			
		A's 8 days durat	ion will be equal to $\frac{2}{2}$	$\frac{2}{2}x^{3} = 12$ days for B.			
	22.	If the measure of the	hree angles of a trian	igle are in the ratio 2: 3:	5, then the triangle is:		
		1.Equilateral	2.Isosceles	3, obtuse angled	4.right angled		
~~~		Ans.4					
		Explanation					
		Let the angles be 2	2x, 3x and 5x.				

	Total of 3 ang	les = 2x + 3x + 5x = 1	$80^{\circ} \rightarrow x = 18;$		
	Hence, the ang	gles are 36, 54, and 9	). Therefore, the triangle	e will be right-angled	•
23.	What must be	added to each term of	the ratio 2 :5, so that it	may equal to 5 : 6?	
	1.12	2.78	3. 65	4.13	
	Ans. 4				
	Explanation				( <b>0</b> )
	(2 + x)::(5 + x)	) = 5::6		20	
	$\rightarrow 6(2 + x) = 5($	$(5+x) \rightarrow 12 + 6x = 25$	$+5x \rightarrow x = 13;$	X	
				0	
24. Th	e radius of a circle	e, whose area is equal to	the sum of the area of tw	o circles of radii 3 cm	and 4
CIII	115				
	1. 6 cm	2. 5 cm	3. 3.5 cm	4. none of these	
	Ans:2				
Expla	anation				
	$\pi \mathrm{R}^2 = \pi . 3^2 + \pi .$	$.4^2 = \pi .25^2$			
	$\therefore R = 5$	X	0		
	(Note: Quick an	nswer can be arrived by	assuming Pythagorean tri	ples. It should take abo	out 10
secon	ids only)			<u> </u>	
25.	4 men and 6 w	vomen completé a wo	rk in 8 days, 2 men and	9 women also compl	ete in
	8 days. The null $1/2/2$ days	$\frac{1}{2} = \frac{5}{2} \frac{2}{2} \frac{1}{2} $	1 for 18 women complet 2 + 1/2 down	e the work is: $4.5 \pm 1/2$ down	
	1. 4 $2/3$ days	2. 5 2/3 days	5. 4 1/3 days	4.5 1/3 days	
	Fundamention				
	Let the one da	work of a man and y	vomen he m. w respecti	velv	
	4m + 6w = 8a	and $2m + 9w = 8$ :	women de m, wrespeet	very	
	To complete th	he work in one day. (4)	$m + 6w$ $\times 8 = (2m + 9w)$	)×8:	
	$\rightarrow 2m = 3w$ , i.	e., 2 men's work is eq	uivalent to 3 women	/ - /	
	As per the give	en condition 1, $4m + 6$	$6w = 8 \rightarrow 6w + 6w = 8$		
	i.e., 12 womer	n can complete the wo	rk in 8 days		
1					

29. Find a simple discount equivalent to a discount series of 10%, 20% and 25%

	Add Eqn.(1) and	Eqn.(2) $\rightarrow \sec\theta = \frac{1}{2}(1)$	$(p + 1/p) = \frac{1}{2}(\frac{p^2 + 1}{p}) \dots$	(3)
	Note (additional	sum): To find tan $\theta$ a	and sin $\theta$	
	Subtract Eqn.(2)	) from Eqn.(1) $\rightarrow$ tar	$\theta = \frac{1}{2}(p - 1/p) = \frac{1}{2}(\frac{p}{2})$	$(\frac{2^2-1}{n})$ (4)
	Divide Eqn.(4) b	by Eqn.(3) $\rightarrow \sin \theta =$	$\frac{p^2-1}{p^2+1}$	r
41.	If $p = 99$ then the	e value of p $(p^2 + 3p)$	+ 3)	~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~
	1.999999	2. 988899	3. 989898	4. 998889
	Ans. 1			
	Explanation = 99(99 ² + 3×99 = 99 [(100 -1) ² + =99 [10000 + 1 -	+ 3); - 3(100 - 1) +3]; - 200 +300];=99(101	01) = 999999;	jilol''
42.	If $x = 2$ then the	value of $x^3 + 27x^2 +$	243x + 631	)
	1.1233 2.	. 1231	3. 1321	4. 1211
	Ans. 1		$\mathbf{x}$	
	Explanation	Ś	0,	
	Substitute $x = 2$	in the given equation		
	$= (2)^3 + 27(2)^2 -$	+ 243(2) + 631;		
	= 8 + 108 + 486	+ 631;= 1233;		
43.	An office opens	at 10 AM and closes	s at 5 PM. The lunch	interval is 30 minutes. The
	ratio of lunch int	erval to the total peri	od of office hours is	
	1. 1:7 Ang 2	2. 1:14	3. 7:1	4. 14:1
	Explanation			
5	Total office hour	$cs = 7$ hours= $7 \times 60 = 4$	20 minutes. Interval	= 30 minutes
	Hence, the requi	red ratio= $30/420 = 1$	: 14;	
45.	If two numbers .	A and B are in the ra	tio 4:5 and the differ	rence of their squares is 81,
	what is the value	e of A?		
	1. 36	2.15	3.45	4.12

## Explanation

Let the first number A= 4x and second number B= 5x;  $25x^2 - 16x^2 = 81 \rightarrow x=9;$ Hence, the value of A = 36;

46. If two circles touch each other internally. The greater circle has its radius as 6 cm and the distance between the centers of the circles is 2 cm. The radius of the other circle is

1. 3cm 2. 4cm 3. 2cm 4. 5 cm

Ans. 2

## Explanation

 $O_1$  is the center of the outer circle and  $O_2$  is the center of inner circle. Both the centres are collinear and  $r_{1=6}$  cm.

∴  $r_1$ +2+ $r_2$  =12 (equal to the diameter of outer circle) →  $r_2$  = 4cm.

6 cm

47. The smallest fraction in the following is  $:\frac{4}{5}, \frac{5}{6}, \frac{6}{7}, \frac{7}{8}$ 

2 cm

(2)  $\frac{6}{7}$  (3)  $\frac{5}{6}$  (4)  $\frac{4}{5}$ 

Ans:4.

(1)

( If the numerator and denominator of a proper fraction differ by 1 and the numerator and denominator of successive fractions increase by 1, the fraction with minimum value of numerator and denominator is the smallest)

48.	A bookseller allowed 15% discount on the books sold. Meena purchased books worth					
	Rs.1500. How much will she has to pay to the bookseller?					
	1. Rs.1200 2. Rs.1250 3. Rs.1275 4. Rs.1300					
	Ans. 3					
	Explanation					
	For the book price of 100, one has to pay 85 after 15% discount (i.e., $100 - 15 = 85\%$ )					
	The amountto be paid for the book cost of $15000 = 85\%$ of $1500 = \text{Rs.} 1275$ .					
	<u> </u>					
49.	If the ratio between the profit and sale price of an article is 1:5, then the ratio between					
	the sale price and the cost price of that article is:					
	1. 3:2       2. 4:3       3. 5:4       4. 6:5					
	Ans. 3					
	Explanation					
	Cost Price = CP, Sale price = SP					
	Cost Price = Sale Price–Profit					
	Let profit be $x \rightarrow SP = 5x$ and therefore $CP = 4x$					
	Sale Price: Cost Price = 5: 4;					
50.	What percent of 1 day is 36 minutes?					
	1. 25%       2. 2.5%       3. 3.6%       4. 0.25%					
	Ans. 2					
	Explanation					
	$1 \text{ day} = 24 \times 60 \text{ minutes} = 1440 \text{ minutes};$					
	The required percentage = $36 \times \frac{100}{1440} = 2.5\%$ .
